python | C# | PHP | JavaScript | NodeJS | React | MongoDB | MySQL | Git | HTML | CSS

Work Experience

Full Stack Projects:-

Task-Management-App:- (1 October - 9 October)

★ I developed a "Task-Management-App" website using **Javascript, Html and Bootstrap**

★ Manage tasks efficiently with user authentication, filtering, and more.

★ **Github Link https://github.com/Farzeel/Tasks-Management-App**

★ **Live website Link https://task-managment-olive.vercel.app/**

Coding-Forum:- (15 Sept - 25 Sept)

★ I developed a "Coding Forum" website using **Bootstrap, PHP and MySQL**

★ It includes diverse **programming language categories, user authentication, problem posting, and a responsive community interaction** system **pagination system** for easy navigation and **efficient search feature**.

★ **Github Link https://github.com/Farzeel/PHP-coding-forum**

Crypto-Blog:- (10 August - 22 August)

★ The "Crypto Blog" project is a full-stack web application built **React Js, Node JS, Express JS and Mongo DB**

★ It leverages **React** for the front-end user interface, **Node and Express for server-side logic, and MongoDB for database management**. **Redux Toolkit is employed for state management**

★ **Github Link https://github.com/Farzeel/Blog-App**

Front End Projects:-

Netflix-Clone:- (1 August - 3 August)

★ The "Netflix Clone" is a web application crafted with **HTML, CSS, and JavaScript**

★ it utilizes the **Fetch API to seamlessly retrieve movie data** from an external source.

★ **Live website Link https://farzeel.github.io/NetflixClone.github.io/**

Hang-Man-Game:-

- ★ The "Hangman Game" is a web-based interactive project developed with **HTML, CSS, and JavaScript.**
- ★ Players can guess words one letter at a time, with incorrect guesses resulting in the **gradual drawing of a hangman**
- ★ **Live website Link** **https://hang-man-game-pi.vercel.app/**
